

When using Logic please use the Audio Unit (AU) version of Strokes - in this setup, Strokes is a [MIDI plugin](#) which generates MIDI notes and CC data.

Drop the plugin into a MIDI FX slot before your instruments, then use [Modifiers](#) to receive CC modulation and map to parameters:

CC20 - CC27 = Matrix CH1-CH8
CC102- CC105 = Weights A - Weights D

Here's a very quick video guide on getting setup -> <https://www.youtube.com/watch?v=avAYyc4e9zI>

On Mac you'll need to use the installer contained in "Install - Mac" - this installer occasionally misses previous installations, so if you're having trouble with Strokes please first remove Strokes.component from these two locations:

[user]/Library/Audio/Plug-Ins/Components
Macintosh HD/Library/Audio/Plug-Ins/Components

Then run the v3.3 installer again.

If you have any suggestions for how to improve this guide, please leave a comment.
