# BITWIG SET UP

In Bitwig you simply load Melody Sauce 2 as a VST plugin onto its own MIDI channel. You then either use the internal sounds by selecting INSTR mode or route the outgoing MIDI from this channel to another channel with your chosen 3rd party software instrument. To do this locate Melody Sauce 2 in the Device menu and double click on it to open.

Note: be sure to use the VST version, and not the AU/Audio Unit.

The authorisation window will appear.  Enter your license/serial key to authorise Melody Sauce 2 (this requires an internet connection).  See Authorisation Guide for more details.

On a second Instrument Track loaded with one of your favourite software instruments, route MIDI by clicking All Ins and selecting Melody Sauce 2 from the menu.

Then finally make sure the track is armed.

Make sure your project is playing and we recommend looping playback for at least 8 bars so you can hear the whole melody. Note: A fast, long melody would be 8 bars long and a long, slow melody would be 16 bars long.

You are now ready to start generating melodies!
