

MELODY SAUCE 2

GARAGEBAND SET UP

In Garageband, load Melody Sauce 2 as an AU plugin on its own instrument track by clicking the Plug-ins tab. Then search the AU Instruments list for Evabeat and select Melody Sauce 2.

The authorisation window will appear. Enter your license/ serial key to authorise Melody Sauce 2 (this requires an internet connection). See Authorisation Guide for more details.

Make sure Melody Sauce 2 is in Instr mode and that your project is playing. We recommend looping playback for at least 8 bars so you can hear the whole melody. Note: A fast, long melody would be 8 bars long and a long, slow melody would be 16 bars long.

You are now ready to start generating melodies!
