

# MELODY SAUCE 2

## LOGIC PRO SETUP

In Logic, Melody Sauce 2 can be loaded as an AU plugin on its own instrument track. This allows you to use the inbuilt sounds. To do this, select Melody Sauce 2 in the *Instrument* slot on an empty Instrument Track.

# MELODY SAUCE 2

Alternatively, it can also be loaded as a MIDI FX if you want to connect Melody Sauce 2 to a synth. This allows both Melody Sauce 2 and the software instrument it's controlling to sit on the same track. To do this, select Melody Sauce 2 in the *MIDI FX* slot on an Instrument Track loaded with one of your favourite software instruments.

The authorisation window will appear. Enter your license/ serial key to authorise Melody Sauce 2 (this requires an internet connection). See Authorisation Guide for more details.

Make sure your project is playing and we recommend looping playback for at least 8 bars so you can hear the whole melody. Note: A fast, long melody would be 8 bars long and a long, slow melody would be 16 bars long.

You are now ready to start generating melodies!
