

# P2D-Plus 1.0.3

## User Guide

<http://sigabort.co/p2d.html>

[m4l@sigabort.co.uk](mailto:m4l@sigabort.co.uk)

# 1 Overview

P2D-Plus is an enhancement for P2D allowing true screen sharing with Live. P2D products that are P2D-Plus aware will automatically use the enhanced functionality when this enhancement is installed.

# 2 Installation

The custom libusb library provided with this release should be placed in each instance of Live that you wish to use it with.

**Please make sure you back up your existing file so you can replace it if you have any problems**

## 2.1.1 Windows

Install the provided **libusb-1.0.dll** in the following directory (change the 'Live 9.6 Suite' section to match your installation):

c:\program data\Ableton\Live 9.6 Suite\Program

## 2.1.2 OSX

Install the provided **libusb-1.0.dylib** in the following directory (change the 'Live 9.6 Suite' section to match your installation):

/Applications/Ableton Live 9.6 Suite.app/Contents/PlugIns/PlugInHosts/PlugInHosts.app/Contents/Libraries

In order to find this directory on OSX you will need to right click on the top level 'Ableton Live 9.6 Suite.app' folder in Applications and select **Show Package Contents**. Do this again for the 'PlugInHosts.app'.
