

Philip Meyer MIDI Tools Release Notes

Blocks v1.1

- Improved resolution of generated result in unquantized mode
- UI more accurately reflects result in quantized vs. unquantized mode
- Improved scale awareness

Polyrhythm v1.1

- UI provides better visual feedback of pattern status
- Fixed UI bug: occasional mismatch between steps and clip length
- Fixed bug: velocity could not be adjusted in Stretch mode

Phase Pattern v1.1

- New feature: Events tab now includes an Iterations parameter like the pitch and velocity tab. Iterations allows the pattern to be looped multiple times over the length of the clip
- Improved behavior when Jitter is nonzero - jitter amount is saved until it is adjusted
- UI facelift
- Range link buttons on Velocity and Pitch tabs now locks the difference between Low and High.
- Improved scale awareness

Divs v1.1

- UI refinements
- Overhauled fit to scale

Feel v1.1

- Fixed issue with mouse hover triggering unwanted transformations
- Randomize button in Advanced Mode
- UI refinements

Draw v. 1.1

- Randomize feature
- UI facelift

- Improved scale awareness

Pattern Transform v1.1

- More musical velocity accumulation
- UI improvements
- Improved scale awareness

Turing Machine v1.1

- All notes are fit to new scale when scale or root note changes
