REQUIREMENTS**

MaxforLive  
is Essential.

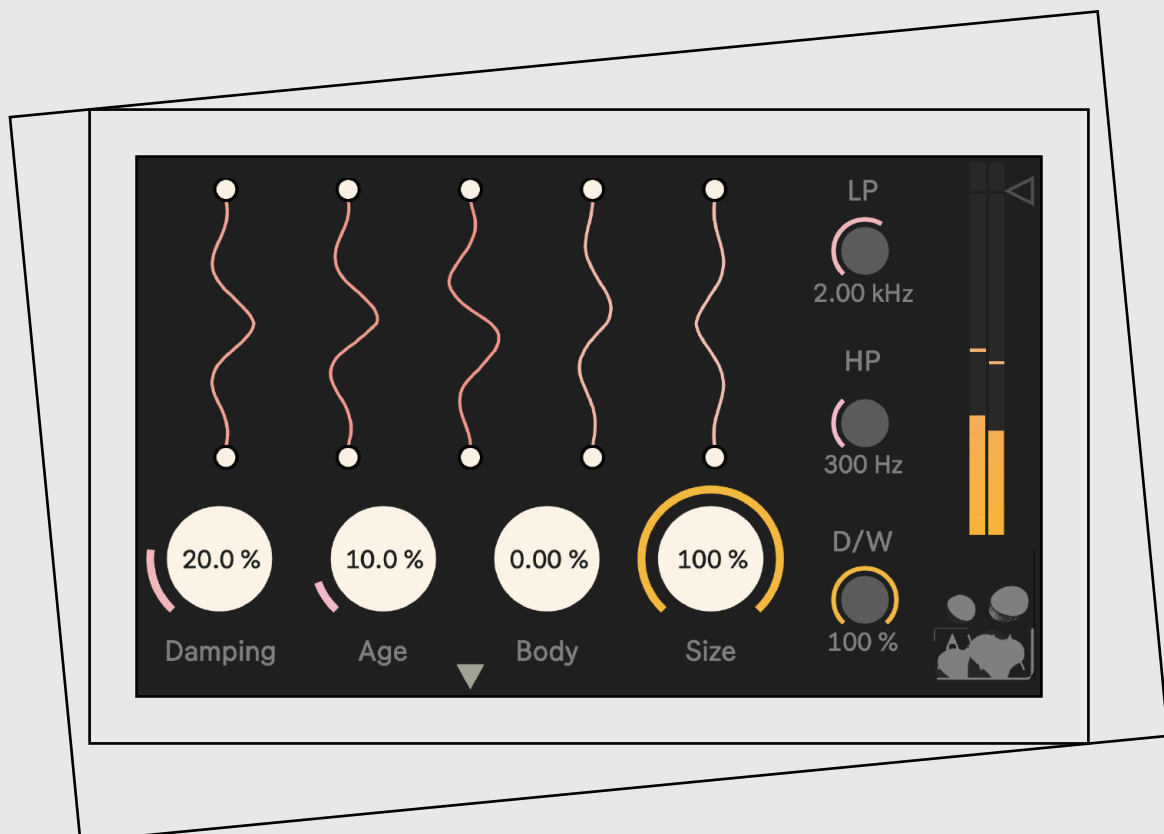

# PIANERB

## PRODUCT LONG DESCRIPTION

A realistic and usable piano soundboard that can be adjusted as desired, thanks to the few but very useful controls available that can be used as a creative and unique reverb system. The device relies on the physical model of a string, the waveguide introduced by Karplus and Strong.

The Pianerb provides as many strings as the piano, including double strings etc, I/O equalization and a resonance system that emulates the material and size of the piano body.

Damping

## DAMPING

decay time, emulates the damping of individual strings.

Age

## AGE

detune the second string of the single note, creating an old piano effect.

Body

## BODY

amount of filtering due to the body of the instrument.

Size

## SIZE

size of the instrument body, modulates resonance frequencies.

LP

input Lowpass Filter  
(12dB/oct)

HP

input Hipass Filter  
(12dB/oct)

DRY WET

amount of dry  
or wet signal

KEYBOARD

choose which string  
to excite
