

① WAVEFORM MENU

All the sounds included in your Pack can be selected using the Waveform Menu without losing your synth settings. You can also choose your sound using the Prev - Next buttons.

② UNISON / GLIDE

The Unison effect offers up to 4 stack voices. Detune sets the amount of detuning between the voices and Spread makes a thicker sound. The Glide effect works also with stacked voices.

③ PARAMETER DISPLAY

Here you can monitor all the parameter settings.

④ FILTER SECTION

Use the Filter Menu to choose between 25 different Filters with Cutoff and Resonance controls. F-Key and Velo determine how much the Cutoff is influenced by the pitch and velocity of the incoming notes.

⑤ FILTER ENVELOPE

Classic ADSR Filter Envelope with adjustable Amount

⑥ VOLUME ENVELOPE

Classic ADSR Volume Envelope with adjustable Attack Slope.

⑦ LFO

Multi-shape LFO with attack time and Retrigger. It can modulate Cutoff, Pitch and Volume using the relative On/Off switches and intensity amounts.

⑧ EFFECTS

Select the 6 built-in Effects using the dedicated tab menu. Insert FX : Phaser, Chorus, Flanger and Rotator. Send FX : Delay and Reverb.

⑨ AUTOMATION

Up to 50 synth parameters can be automated in your favorite DAW.
